

**The Hamburg University of Technology  
Symposium on Research-Based Learning**

**Professor Mick Healey  
([www.mickhealey.co.uk](http://www.mickhealey.co.uk))  
Healey HE Consultants and University of Gloucestershire, UK**

**Thursday 6 June 2019**

**Engaging students in research and inquiry  
(Professors' Lounge Part I, public)**

**Keynote  
15.30-17.00**

*"For the students who are the professionals of the future, developing the ability to investigate problems, make judgments on the basis of sound evidence, take decisions on a rational basis, and understand what they are doing and why, is vital. Research and inquiry is not just for those who choose to pursue an academic career. It is central to professional life in the twenty-first century."*  
(Brew, 2007)

In this interactive session, we will explore the variety of ways in which research and inquiry-based learning may be integrated into the curriculum, using numerous mini case studies of practices from different countries with a particular emphasis on STEM disciplines. Particular emphasis will be placed on the application of the ideas to professional technological courses. Discussions will include both practice-based research that involves engaging students as partners working with and on industry problems and educational action-research. A key issue is how to develop 'inclusive knowledge-building communities' (Brew 2007) in which students become partners in learning and teaching and are treated as co-researchers, co-inquirers and co-professionals.

**Strategies and practices for engaging students in research and inquiry  
(Professors' Lounge Part II, TUHH professors only after registration)  
18.00-20.00**

In this continuation of the discussion in the keynote, Mick will engage in a conversation with TUHH professors. The focus of the discussion will be on identifying and sharing some key strategies and practices for enhancing students' engagement in research and inquiry particularly in STEM disciplines and the role of the professoriate in leading and promoting these initiatives.

**Mick Healey** is an HE Consultant and Researcher, Emeritus Professor at University of Gloucestershire, UK, The Humboldt Distinguished Scholar in Research-Based Learning at McMaster University, Canada, and a Visiting Fellow at the University of Queensland. He was awarded a UK National Teaching Fellowship (2000) and received the ISSoTL Distinguished Service Award (2015). Mick has written and edited over 200 papers, chapters, books and guides on various aspects of teaching and learning in HE, with a particular emphasis on research and inquiry-based learning and students working in partnership with staff. He has over 8,750 citations. He has co-edited four international HE journals and is the inaugural senior editor for the [\*International Journal for Students as Partners\*](#).
